Veterinary Pharmaceutical Submissions in the EU

17-18 May 27
+ 18-19 November 27

Presentations will cover the regulatory framework, pharmaceutical, toxicological and pharmacological data, safety risk assessments, pre-clinical and clinical data, critical expert reports and regulatory submissions.

Format:
Live online

CPD:
12 hours for your records

Certificate of completion

Course overview

Obtaining a marketing authorisation for a veterinary medicine can be a costly and time-consuming process and this practical two-day course will equip participants with the key information to achieve a successful application.

The programme will take delegates through all of the constituent parts of the application for marketing authorisation for a veterinary medicinal product in the European Union, including the maximum residue limits dossier.

Presentations will cover the regulatory framework; pharmaceutical, toxicological and pharmacological data; safety risk assessments; pre-clinical and clinical data; critical expert reports and regulatory submissions.

An important part of the programme will be devoted to working on case studies in the workshop sessions and there will be ample opportunity for discussion throughout the two days with the expert trainer and fellow professionals.

Benefits of attending

- **Understand** the EU regulatory framework
- **Learn** the pharmaceutical data requirements
- **Know how** to comply with the safety requirements
- **Review** the user safety risk assessment
- **Consider** the environmental risk assessment
- **Receive** guidance on preparing critical expert report
- **Consider** the pre-clinical and clinical requirements
- **Take away** regulatory strategies and procedures
- **Acquire** the skills to write the regulatory submission

Who should attend?

Personnel working in the following departments:

- Regulatory affairs
- Research and development
- Clinical trials
- Marketing

The course will also be valuable to those seeking to review special problems encountered in the registration of veterinary medicines.

Programme

Day 1

EU regulatory framework

- Understanding the regulatory objectives
- EU legal framework
- Legal base of regulatory procedures and dossier requirements

Part 2: Pharmaceutical data requirements

- Formulation and analytical data
- Manufacturing process
- Stability studies

Maximum Residue Limits (MRLs) and MA Part 3B residues data

- MRL dossier: safety file and residue file
- Residue depletion studies
- Setting the withdrawal period

Pharmacokinetics and bioequivalence

Day 2

Part 3A of the marketing authorisation (MA) application

- Pharmacology and toxicology studies
- User safety risk assessment
  - Setting the scenario
  - Risk assessment and management
- Environmental risk assessment
  - Phase I and II assessments

Part 4A: Pre-clinical data

- Pharmacodynamics and pharmacokinetics
- Bioequivalence studies
- Resistance
- Dose determination and confirmation
- Target species tolerance

Part 4B: Clinical data

- Clinical trials

EU regulatory strategies and procedures

- Full and abbreviated applications
- Generic applications
- Centralised procedure
- Decentralised, MRP and national procedures

Workshop session 1

Planning a dossier to contain:

- Pharmaceutical development studies
- Toxicological, pharmacokinetic, metabolism and residue studies
- Pre-clinical and clinical studies

Writing the regulatory submission

- Writing the dossier
- Summary of product characteristics and labelling
- Working with writers of detailed and critical summaries

Presenters

Dave Parry

David Parry is a chemist with over 14 years of experience in in veterinary medicinal product development and registration. In his current position as CMC team leader at knoell, David works with manufacturers in developing formulations and the commercial manufacturing process. Taking advantage of his previous roles in pharmaceutical research and development and process development, David brings a broad range of chemistry, manufacturing and regulatory knowledge to projects. With extensive experience interacting with regulatory authorities in most major global animal health markets and working with contract manufacturing organisations, David is involved with all aspects of regulatory support from early stage development through to post approval product maintenance.

Andrew Hewitt

Dr Andrew Hewitt is a veterinarian with over 14 years of experience in Veterinary Medicinal Product development in a clinical and regulatory capacity. In his current position as Senior Advisor for Veterinary Product Development at knoell, Andrew manages all aspects of regulatory input in product development and registration, from early proof of concept right through to post authorisation work. Taking advantage of previous his previous role as a clinical practitioner in the UK, and investigator and monitor on clinical trials, Andrew brings a broad range of clinical and regulatory knowledge to projects. With extensive experience interacting with regulatory authorities in most major global animal health markets, Andrew has a particular interest in strategic regulatory planning during product development.

Reviews

★★★★★

Excellent! I particularly appreciated the use of relevant examples - especially valuable in facilitating comprehension of the EMA processes. In addition, the clarity of the presentations and the logical progression of the topics contributed to a very effective learning experience. Overall the course was excellent, and the speakers demonstrated a high level of expertise and effective teaching skills, which significantly contributed to the quality of the learning experience and added substantial value to the content presented.

★★★★★

The speakers demonstrated a high level of expertise and professionalism throughout the webinar. Their presentations were clear, well-structured, and easy to follow, which greatly facilitated understanding of complex topics. Additionally, they were engaging and effective in communicating the content, ensuring that the session remained informative and relevant. Overall, their strong knowledge of the subject matter and ability to convey it in a practical and accessible way were highly appreciated.

★★★★★

My goal was to gain a deeper awareness and understanding of what is required in the different sections of a dossier for submission in the EU. I think the course definitely accomplished this and there was lots of useful information, which was very well explained. I can confidently say that I left knowing a lot more than I initially thought I would.

★★★★★

Fantastic webinar! Speakers were very knowledgeable, clear, concise, and open to questions at any time—providing in depth background information were appropriate as well. The content was very interesting and I think a very good amount was covered considering the timescales. I enjoyed the workshop a lot. I thought it was a good way to try and put into practice what we had learnt during the webinars. I also thought a very good amount of information was covered for an introduction into the sections of the dossier.
