A Practical Approach to Veterinary Vaccine Development and Registration in the EU

9-10 March 27
+ 22-23 September 27

This event has been designed to give practical advice and guidance on how to successfully develop market approval in the EU. The programme will take participants through a step-by-step approach to the process and will also provide key guidance on how to maintain MA once achieved.

Format:
Live online

CPD:
12 hours for your records

Certificate of completion

Course overview

Demand for biologics in veterinary medicine is increasing. However, developing vaccines and successfully obtaining market authorisation brings its own complex and challenging issues.

This course has been designed to give practical advice and guidance on how to successfully develop a veterinary vaccine and achieve market approval in the EU, ensuring that participants gain a comprehensive insight into the necessary requirements.

The programme will take a step-by-step approach to the process and will include a workshop to help delegates gain a better understanding of the requirements in practice. There will be ample time for discussion throughout the two days with our expert faculty and fellow professionals.

Sponsored by:

Benefits of attending

- **Recognise** the key legislation and guidance and how to use this to plan an effective veterinary vaccine development
- **Understand** what data you need to generate for your application and how to present this in your dossier
- **Gain** an insight into the different routes to market and how to submit your dossier for market approval
- **Learn** how and when to seek regulatory advice during development
- **Consider** the implications of the ongoing review of the Veterinary Medicines Regulations

Who should attend?

This event will be beneficial to all those working with veterinary vaccines from development to market approval.

The programme will be of particular interest to:

- New entrants to registration departments
- Veterinary medicinal product manufacturers
- Registration managers
- Research and development departments
- Academics with an interest in commercialising opportunities
- Personnel from micro/small and medium-sized enterprises (SMEs)

Presenters

Mel Munro

Dr Mel Munro has worked as a consultant in veterinary medicinal product development and registration for over 20 years. She provides regulatory advice on all areas of biologicals product development taking client projects from proof of concept through to Marketing Authorisation (MA). On a day-to-day basis, she advises on regulatory strategy, performs technical due diligence and gap analyses and prepares strategic development plans and expert reports. She is also experienced in negotiation with the regulators and preparing regulatory documentation. Over her career she has been involved in numerous biologicals projects ranging from more 'conventional' vaccines to novel biologicals such as products of rDNA technology, GMO's, monoclonal antibodies, DNA vaccines and gene therapy.

Michael Fontaine

Michael holds a PhD in molecular bacteriology, and has over 25 years of experience in the discovery and development of biological products for the animal health industry. His early experience was at the interface between academia and industry, within the applied environment of animal health research institutes in North America and the UK, where he led projects studying host-pathogen interactions to inform the discovery of new vaccines and diagnostics, on behalf of leading animal health companies.

Michael subsequently moved into animal health industry roles, and has held senior positions within Benchmark Animal Health and Virbac, with responsibility for directing the development of new biological products, with an emphasis on generating the Quality, Safety and Efficacy data necessary to support successful product registrations. He has worked with a range of different biological technology platforms and has used his collective knowledge and experience to provide support for a variety of biotechnology companies in his later role as an independent consultant, prior to joining the knoell team in early 2024.

Course dates

9-10 March 27	**Live online** 08:30-15:30 **UK (London)** (UTC+00) *Course code 17039*	GBP **1,299** ~~1,499~~ EUR **1,819** ~~2,099~~ USD **2,087** ~~2,399~~ **Until 12 Jan**
22-23 September 27	**Live online** 08:30-16:45 **UK (London)** (UTC+01) *Course code 17347*	GBP **1,299** ~~1,499~~ EUR **1,819** ~~2,099~~ USD **2,087** ~~2,399~~ **Until 28 Jul**

How to book

Online:

Reviews

★★★★★

This seminar provided excellent teaching thanks to an impeccable structure and engaging speakers. I learned a lot. The volume of information was dense, but the clarity of the organization makes it perfectly exploitable in deferred viewing. It is an ideal resource for modular and punctual consultation depending on requirements. I most appreciated the listing of applicable regulatory guidances, as I know I will frequently refer to them in my work. The practical exercise was also excellent for solidifying the theory previously learned.

★★★★★

I manage externals who work for/with my colleagues in the field of veterinary vaccines. In order to better understand their daily work, I attended this training. I think I can now better understand what my colleagues and our external partners have to do with RA activities for vaccines. I liked that I was able to work well in the SPC workshop regarding "Wondabov" despite my limited experience. That was very gratifying and motivating. [Speakers] were both very nice.

★★★★★

I wanted to have a synthetic overview of part 3 and 4 and wanted to have the clue to build a relevant and efficient clinical development plan.. Very good opinion of content, presentation and speaker.
