Pharmaceutical Packaging Essentials: From Regulatory Compliance to Market Success

17-19 March 27
+ 21-23 September 27

Master pharmaceutical packaging essentials in 3 days: materials selection, regulatory compliance, and testing requirements. Led by industry expert with 25+ years' experience.

Format:
Live online

CPD:
18 hours for your records

Certificate of completion

Course overview

Gain crucial insights into the unique issues and challenges of pharmaceutical packaging to ensure product safety, compliance, and market success in this interactive course.

Effective packaging of pharmaceutical and healthcare products is critical not only for maintaining product integrity and safety but also for regulatory compliance and market acceptance.

Packaging serves multiple functions beyond containment, including protection from environmental factors, ensuring product stability, and providing essential information to healthcare providers and patients. Understanding the intricacies of pharmaceutical packaging is vital for professionals involves in drug development, manufacturing, regulatory affairs, quality control, and logistics.

This introductory course is designed to equip delegates with a foundational understanding and/or refresher of pharmaceutical product packaging. It begins with a comprehensive regulatory overview, ensuring participants grasp the essential requirements and compliance standards governing pharmaceutical packaging. The programme also delves into crucial topics such as the selection of packaging materials, considerations for compatibility and stability (including ICH testing and extractables/leachables studies), and the role of packaging in new product development.

Additional topics include:

- Pharmaceutical packaging formats and materials available - advantages and applications
- Trade and transit requirements
- Environmental considerations
- Artwork design essentials
- Specialised areas – child-resistant closures and tamper-evident packaging

Benefits of attending

- **Gain** insight into packaging components and material/system selection
- **Explore** pack testing and evaluation
- **Discuss** printing processes and controls
- **Acquire** knowledge on artwork generation and control
- **Ensure** that you comply with the regulatory requirements
- **Learn** about transit packaging
- **Consider** trade/supply chain requirements
- **Interact** with your fellow delegates and course trainer in Q&A sessions and discussions throughout

Who should attend?

Whether you are new to the industry, have a basic understanding of pharmaceutical packaging or are more familiar with the area but looking for a refresher, this course will provide you with valuable knowledge and insights. Those who would benefit from attending include:

- Account managers
- Artwork producers
- Auditors
- Business developers
- Clinical trial suppliers
- Logistics personnel
- Packaging design/labelling personnel
- Project managers
- Purchasers
- Quality assurance and control personnel
- Regulatory personnel
- Suppliers to the industry
- Technical writers

Reviews

★★★★★

10/10! Worth it! I enjoyed how we covered a wide range of topics, it was a very comprehensive overview and easy to follow along. I also enjoyed the presenter he is obviously an expert in his field. His delivery was clear and he made the course fun to attend.

★★★★☆

The speaker was knowledgeable and used practical industry examples to explain complex subjects. I particularly appreciated the opportunity to ask questions throughout the sessions and the speaker's willingness to discuss real packaging challenges raised by participants. Overall, the webinar was comprehensive, technically relevant and valuable for pharmaceutical packaging professionals. It successfully connected regulatory requirements with packaging materials, testing, product protection, patient use and lifecycle management.
