Course overview

This intensive one-day training course is designed to provide a comprehensive understanding of the critical role played by Non-Executive Directors (NEDs) in modern corporate governance. Delegates will gain insights into the legal, ethical, and practical aspects of the NED position, exploring how non-executive directors contribute to organisational strategy, risk management and overall board effectiveness.

Throughout the training course you will gain insights through interaction with the expert trainer and peers, examining real-world case studies and participating in interactive discussions. The training will cover key areas such as board dynamics, financial oversight, stakeholder management and the evolving landscape of corporate governance. These are crucial topics that all new and existing NEDs need to have a very good understanding of.

By the end of the training course, you will have a clear understanding of the responsibilities, challenges and opportunities associated with the Non-Executive Director role. You will be equipped with practical tools, techniques and strategies to enhance your effectiveness as a NED, or to prepare for future NED positions.

The expert trainer will use a mix of theory, case studies and practical examples to bring the topic to life and help embed the learning.
