Course overview

UK data protection law continues to evolve, requiring organisations to adapt their compliance programmes to meet new legal, regulatory and operational challenges.

Navigating GDPR compliance can feel like a minefield - complex rules, evolving guidance and significant risks of costly mistakes. This intensive training course, led by expert trainer Mark Weston, will cut through the complexity and bring you fully up to date with the latest developments, requirements and practical solutions.

You will gain a clear understanding of the core principles and obligations under GDPR, from legal bases and individual rights to data breaches and extra-territorial transfers. The training will also cover the impact of non-compliance and provide practical strategies for embedding compliance into everyday business operations.

A special focus is devoted to Data Subject Access Rights (DSARs) - an area that continues to present significant challenges. You will be guided step by step through DSAR handling, including charges, disclosures, time limits and how to resolve post-disclosure problems. Real-world examples and ICO guidance will help you apply these rules with confidence.

This training course is designed to be highly practical, with opportunities to ask questions and discuss your specific challenges. You'll work through real-world scenarios, get your specific questions answered, and gain actionable strategies you can implement immediately. By the end of the training course, you will be equipped with the knowledge and tools to reduce risk, achieve compliance and manage DSARs effectively.
