Data Integrity Auditor Masterclass

During this course, data integrity will be discussed from the perspective of GxP audits, with practical advice for successful data integrity audits given.

Format:
Bespoke training

CPD:
12 hours for your records (depending on your requirements)

Certificate of completion

Course overview

Over the past decade, data integrity has become the number one focus in regulatory inspections - and it's showing no signs of slowing down. While the topic has only recently taken centre stage, its roots stretch back 30 years, with early breaches at Barr Laboratories and Able highlighting just how long-standing and serious the issue truly is.

As health authorities continue to scrutinise data integrity during audits, especially GMP audits, pharmaceutical manufacturers are under increasing pressure to ensure their internal teams are well prepared.

This intensive two-day course, delivered through practical guidance and real-world examples, explores data integrity through the lens of GxP audits. You'll gain a clear understanding of regulatory expectations, the core concepts and guidelines, and what auditors need to know to uncover deficiencies before the authorities do.

Participants will explore which departments require data integrity auditing - from warehouse and production to quality control, quality assurance, engineering, and critical utilities. Sample audit questions, common findings, and real case studies bring the learning to life, ensuring you leave equipped to carry out confident, effective audits.

Whether you're building an audit-ready culture or sharpening your team's inspection-readiness, this course will give you the tools and insight to make a measurable impact.

Benefits of attending

- **Learn** exactly what health authorities expect from data integrity audits and how to meet those requirements
- **Evaluate** the concept of data integrity from a fresh, practical, and audit-focused perspective
- **Understand** the role of the data integrity auditor and the essential skills needed to perform effectively
- **Discover** how to audit and prepare for external inspections across key departments, including warehouse, manufacturing, quality control, quality assurance, critical utilities, and engineering

At the end of the course, there will be a short assessment exam featuring case studies and audit scenarios that will have been analysed during the training. Delegates who successfully pass the assessment will receive the title of 'Certified Data Integrity Auditor'.

Who should attend?

Personnel from the following departments will benefit from this course:

- Quality assurance and quality control
- Validation
- R&D
- Audit
- Regulatory
- IT
- Warehouse and supply chain
- Engineering
- Procurement

As well as:

- Health authority inspectors

Run this programme in-house for your whole team

Coming to IPI Academy for your in-house training provides an all-inclusive service which gives you access to a wide variety of content, learning platforms and delivery mechanisms as well as your own personal training adviser who will work with you from the initial enquiry through to feedback and follow-up after the programme.

With over 600 trainers, all practitioners and experts across a huge range of fields, we can provide the training you need, where you need it, when you need it, and at a price which suits your budget. Our approach to tailored learning and development consists of designing and delivering the appropriate solution for each client.

For your FREE consultation and to find out more about how we can work with you to solve your training needs, please contact our training advisers:
