The Regulatory Requirements on Nitrosamines in the Pharmaceutical Industry

19-20 April 27
+ 11-12 October 27

In this webinar, we will discuss the major requirements and strategies for nitrosamines, a hot topic that is on the forefront of many company's minds.

Format:
Live online

CPD:
6 hours for your records

Certificate of completion

Course overview

Nitrosamine regulations are the most impactful change to our industry in recent years, affecting 30% of current and new products, including generics. Regulatory expectations have changed frequently and vary globally. In this webinar, we will discuss the major requirements and strategies. Those new to the subject and those growing their nitrosamine team will find value in seeing the entire picture. Experienced Small and Medium-sized Enterprises (SMEs) will receive detailed instructions for common pain points, like risk assessments.

Benefits of attending

- **Enhance** your understanding of current regulatory framework and recent changes
- **See** the full scope of work for your team members to understand how their part fits with the whole
- **Learn** best practices for risk assessments
- **Inform** next steps when your product is near or above regulatory limits through remediation, control strategies, and new research
- **Example products** guide the way to practical understanding

Who should attend?

This course will benefit nitrosamine decision makers and those who can benefit from a broader understanding of the full picture of nitrosamines in regulatory affairs, sales, quality, and analytical departments.

Presenter

Jason Brown

Jason Brown brings a wealth of knowledge and practical experience to his role as Senior Analytical Sciences Manager at Adare Pharma Solutions, where he serves as the global nitrosamine subject matter expert. He has led Adare's innovative approaches to understanding nitrosamine formation, measurement, and mitigation to ensure regulatory compliance internally and for our customers. Jason has led numerous dialogues on the subject of nitrosamines through panel discussions, webinars, posters, articles, and regular contributions to the USP Nitrosamine Forum. Jason has a BS in Chemistry from George Fox University.

Course dates

19-20 April 27	**Live online** 13:00-16:00 **UK (London)** (UTC+01) *Course code 17098*	GBP **649** ~~749~~ EUR **909** ~~1,049~~ USD **1,043** ~~1,199~~ **Until 22 Feb**
11-12 October 27	**Live online** 13:00-16:00 **UK (London)** (UTC+01) *Course code 17405*	GBP **649** ~~749~~ EUR **909** ~~1,049~~ USD **1,043** ~~1,199~~ **Until 16 Aug**

Reviews

★★★★☆

Learned more about the role of formulation in Nitrosamines risk mitigation and risk assessment.

★★★★☆

Very Good. It was a lot more comprehensive than I thought it would be. However, this is a complex area which is still evolving and It's a tough subject in organic chemistry! It was challenging but I now know where to look and who to ask when I have questions. It was a new area for me and I left knowing the background to the topic, what the current requirements are and how to apply this when it comes to producing new marketing authorisation applications.

★★★★☆

I really enjoyed the training. Both the presentation and the speaker were very clear in conveying the knowledge. I was able to achieve both (my) objectives; to gain new knowledge and delve deeper into some topics that I wasn't so aware of, and also to get a glimpse of the future in relation to nitrosamines. I really liked the fact that there was a separation between a part that focused more on 'before the lab' and 'the lab and beyond application' and covered a little bit of everything. My final evaluation is very positive.

Run this programme in-house for your whole team

Coming to IPI Academy for your in-house training provides an all-inclusive service which gives you access to a wide variety of content, learning platforms and delivery mechanisms as well as your own personal training adviser who will work with you from the initial enquiry through to feedback and follow-up after the programme.

With over 600 trainers, all practitioners and experts across a huge range of fields, we can provide the training you need, where you need it, when you need it, and at a price which suits your budget. Our approach to tailored learning and development consists of designing and delivering the appropriate solution for each client.

For your FREE consultation and to find out more about how we can work with you to solve your training needs, please contact our training advisers:
