An Introduction to Signal Detection

This course provides a foundation in the critical role of signal detection in ensuring the safety and efficacy of medicines.

Format:
Bespoke training

CPD:
1.5 hours for your records (depending on your requirements)

Certificate of completion

Overview

Attending this course will help you build a strong foundation in pharmacovigilance, enhance your analytical skills, understand regulatory decision-making, stay current with advanced detection techniques, and contribute to improving patient safety. By the end of the course, you'll understand the vital role signal detection plays in the lifecycle of medicines, from molecule to medicine!

Benefits of attending

- **Gain** essential knowledge of signal detection principles and practices in pharmacovigilance
- **Learn** how to identify, evaluate, and interpret signals from diverse data sources
- **Explore** how signal detection informs benefit/risk assessments and regulatory decision-making
- **Develop** an understanding of advanced detection techniques like data mining and disproportionality analysis
- **Equip** yourself to play a key role in safeguarding public health by detecting and acting on potential safety signals

Who should attend?

All clinical, pharmacovigilance and regulatory affairs personnel new to signal detection, or in need of a refresher, would benefit from this course.

Run this programme in-house for your whole team

Coming to IPI Academy for your in-house training provides an all-inclusive service which gives you access to a wide variety of content, learning platforms and delivery mechanisms as well as your own personal training adviser who will work with you from the initial enquiry through to feedback and follow-up after the programme.

With over 600 trainers, all practitioners and experts across a huge range of fields, we can provide the training you need, where you need it, when you need it, and at a price which suits your budget. Our approach to tailored learning and development consists of designing and delivering the appropriate solution for each client.

For your FREE consultation and to find out more about how we can work with you to solve your training needs, please contact our training advisers:
