Selecting the Best Scientific Journal for Your Research

This session provides an essential guide to selecting both the best and authentic scientific journal for your research, offering practical strategies for using indexing systems and selector tools to enhance visibility and credibility.

Format:
Bespoke training

CPD:
1.5 hours for your records (depending on your requirements)

Certificate of completion

Overview

This session offers a detailed guide to selecting the most appropriate scientific journal for your research, ensuring alignment with your study's scope, audience, and academic goals. Participants will learn how to distinguish between predatory journals, which lack rigorous peer review standards, and authentic, reputable journals that uphold academic integrity. Additionally, the session provides practical strategies for navigating journal indexing systems, understanding their significance in journal credibility, and effectively using journal selector tools to streamline the publication process and maximise research impact.

Benefits of attending

At the end of this workshop, attendees will be able to:

- **Assess** journal metrics like Impact Factor, CiteScore, and SJR Score for journal selection
- **Recognise** and **avoid** predatory journals by understanding their characteristics and red flags
- **Understand** journal indexing and selector tools

Who should attend?

- Early-career researchers and academicians looking to publish their research in reputable scientific journals
- Graduate and postgraduate students aiming to understand the academic publication process
- Research assistants, lab members, and academic staff involved in manuscript writing and submissions
- Science professionals, technical writers, and consultants seeking to enhance their knowledge of scholarly publishing practices
- Anyone interested in developing skills for selecting appropriate journals and navigating the publication process efficiently

Reviews

★★★★★

Fantastic overall - well pitched, not too long and sufficiently detailed that I left feeling much more knowledgable in the topic area. Samaa is so engaging as a speaker and teacher - i feel very comfortable with asking questions and contriubuting to discussion. I also appreciate that she reminds us of things covered in the last class, and then builds on those points.
